

# World Project „FRIZZEY- LIGHTS“ of this world and for this world

coming to this planet with a message:

“We are invited to live on this earth only for limited time. In the end we cannot take anything with us, but we can leave something positive behind”.

**„Frizzey Lights“  
a worldproject to unite the people of this earth**

a open minds  
symphony for all  
sense

Fire Water  
Earth Air

**A time travel into the fifth dimension.  
How can we live together on this planet and in harmony.**

**A realistic fairytale with the longest shooting time.  
Traveling the world since 1997 with many adventures.  
A sensual once in a lifetime story from which I got so much  
unbelievable material to create this piece of art.**

**A multimedia experience, living together with the whole world  
for 115 minutes combined with my home to be amazed,  
dream, think, dance, feel, hear, see smell and many more.**

**„I found this light and share it with the world“**

## **Frizzey Greif**

showing guts –  
visual and acoustic ambassador

I see what I hear and I hear what I see.  
This experience has developed my life.  
Impressive experiences, tests and fate  
have formed me and knew how to convert  
these experiences visually and  
acoustically.

Art for human, culture, tourism, economy

After I drew the economy's attention, I had many projects, I was producing and I gave concerts. So I was able to build my own professional film and music studio.

I composed over 4000 pieces which include musicals and other numerous films.

Many awards and one of them in

2003 as "Ambassador of peace" in Vienna with my project "African Lights".

„With the idea of a special Open Air event  
a new dimension was created.

I was kept busy for decades because of so many topics. The life on this planet, our senses, the cosmos, the climate, nature, the people and their cultures, the elements and vibrations. There was always a new melody or a vision that kept me going and let me create this breathtaking world project on a level where no limits seem to exist.

A level where things like skin colour or religion don't matter. A level opening the mind and where in the end there is nothing left but love.

**This "world project"** unites vibes and sounds between people and visual impressions.  
I compose to the sequences of different cultures creating a new music combined with impressive video recording.

"Only as long as we reach out to each other and accept each other we can contribute to the harmony on this planet"

Use the talent that was given to you to make other people happy.

	Your dreams and ideas are similar to mine. We will be in touch – this is not a threat – in abrazo fiesta.- <b>Dietmar Schönherr</b> - Nigeria
